RABIA IMTIAZ

Full Stack Software Engineer | .NET, MERN, Flutter
Karachi, Pakistan | 0324-1458873 | rabiaimtiaz203@gmail.com
GitHub: github.com/Rabia303 | LinkedIn: linkedin.com/in/rabia-imtiaz | Portfolio: rabia-portfolio-puce.vercel.app

OBJECTIVE

Full Stack Software Engineer with hands-on experience across .NET Core, ASP.NET MVC, Angular, and the MERN stack, plus mobile development in Flutter. Comfortable working end-to-end - from REST API design and relational database logic (SQL Server, stored procedures, LINQ) to building responsive frontends and cross-platform mobile apps. Strong foundation in OOP and scalable application design, with a track record of shipping full-stack projects independently, from AI-integrated platforms to data-driven web applications.

EDUCATION

Dawood University of Engineering and Technology
Bachelor of Science, Computer Science — *Graduation Date: April 2025*

Aptech Learning Center
Advanced Diploma in Software Engineering (ADSE II) — *Graduation Date: Oct 2025*

EXPERIENCE

***CipherTronix** - Junior Technology Consultant* — *Nov 2025 - Present*
Full stack engineer on STOS, a terminal and cargo management platform deployed across port terminals in Pakistan.

- *Engineered financial reports and features for the Accounts module using .NET MVC and SQL Server, including AR/AP aging, customer/vendor inquiry, and profit & loss reports*
- *Wrote data logic using stored procedures, LINQ, and raw SQL to power billing, invoicing, and financial reporting workflows*
- *Built the Procurement module frontend in Angular (TypeScript), integrating RESTful APIs developed with ASP.NET Web API to support requisitions, RFQ comparison, and purchase order workflows*
- *Contributed full-stack development on the Logistics module - covering order creation, gate movement tracking, and real-time monitoring workflows using .NET MVC and SQL Server*
- *Delivered across three modules (Accounts, Procurement, Logistics) spanning .NET and Angular, adapting quickly to new technologies as project needs evolved*

***CipherTronix** - .NET Developer Intern* — *Oct 2025 - Nov 2025*
Analyzed database schemas, EDI workflows, and multi-database operations for enterprise financial and cargo management systems

- Installed and tested application builds on IIS, documenting modules, pages, and system functionality for internal reference

PROJECTS

***Muhafiz - Karachi Crime Zone & Safety Platform | React (Vite), Node.js, Express, Flask, MongoDB** - GitHub*

- Developed a full-stack urban safety platform with zone-based risk mapping, incident reporting, safer route suggestions (risk algorithm), secure JWT-based admin/user dashboards, interactive discussion forum, and Power BI analytics for data-driven insights.
- Built and processed a custom crime dataset (100,000+ records) by scraping Google Search via Outscraper API, geocoding unstructured locations, and tagging severity zones across 18 towns and 170+ subdivisions.

***TalkToText Pro - AI-Powered Meeting Notes & Subtitles | Python, Flask, React.js, MongoDB Atlas** - GitHub*

- Developed a full-stack AI application that processes meeting audio/video from uploads or links (Teams, Meet, Zoom) to generate transcripts, summaries, and subtitles using the Gemini API.
- Engineered a secure authentication system with GitHub OAuth, Google Sign-In, and custom OTP to protect user data and meeting history stored in MongoDB. Designed a responsive React front-end with a real-time progress tracker and multi-format export, processing a 30-minute meeting in under 2 minutes.

***Multivox: AI-Powered Instant Dubbing & Subtitling Platform | React (Vite), Flask, OpenAI Whisper** - GitHub*

- Led development of an AI platform for real-time video dubbing & subtitling via URL or upload, integrating Whisper for transcription and gTTS for speech synthesis.
- Built a complex processing pipeline to download audio, transcribe, translate, generate speech, and perfectly resync new audio to the original video. Overcame significant technical hurdles including GPU limitations and audio-video synchronization to deliver a functional, well-received prototype.

CERTIFICATIONS

Java Programming (Aptech Learning Center) — *Apr 2022-June 2022*
Completed a 2-month Java programming course focused on object-oriented programming (OOP) concepts, JFrames, and Java development. Built multiple projects, including desktop applications, applying OOP principles and GUI components.

ACHIEVEMENTS

- Nominated for HBL P@SHA ICT Awards 2025 for Muhafiz (Karachi crime safety platform).
- Selected for Aptech Vision 2025 for Multivox (AI dubbing & subtitling).
- Published Karachi Synthetic Crime Dataset (100,000+ records) on Kaggle.

TECHNICAL SKILLS

Languages: Python, Java, C++, C#, PHP, JavaScript, TypeScript, Dart
Frameworks/Libraries: React, Node.js, Express, Angular, ASP.NET MVC, Laravel, Flutter, Bootstrap, jQuery
Databases/Tools: MySQL, MongoDB, SQL Server, Postman, Git/GitHub, VS Code, Visual Studio, IntelliJ
Core Skills: Full Stack Development (MERN/.NET), Object-Oriented Programming (OOP), REST APIs, RESTful API Design, Cross-Platform Development
